Prahlad Krishna

1515 Hartford Terrace, Atlanta, GA 30004 | +1 (470) 638-5103 | prahladbalaram@gmail.com | U.S. Citizen

Objective

Computer Engineering student with hands-on experience in AI/ML and full-stack development, seeking a Software Engineering or Cybersecurity internship beginning May 2027 to bring strong technical and leadership skills to a fast-moving engineering team.

Education

Georgia Institute of Technology | Atlanta, GA *August 2026 – May 2030*
Bachelor of Science in Computer Engineering, Expected Graduation, May 2030

Skills

Programming: Python, Java, JavaScript, Node.js, HTML, CSS

Platforms & Tools: Linux (Ubuntu, CLI), FastAPI, Neo4j (graph databases), Git/GitHub

Cybersecurity: Wireshark, Kali Linux, Windows PowerShell, Nmap, CyberChef, Hashcat

Certifications: Python Certified; Microsoft Office Specialist (PowerPoint, Word); 2 Coursera AI Certifications

Languages: English (proficient), Telugu (proficient), Tamil (proficient), Spanish (moderate), Sanskrit (moderate)

Experience

Spydr | Atlanta, GA *April 2025 – March 2026*
AI Research & Product Development Intern

AI research startup building LLM-powered knowledge-mapping and deep research tools.

- Refined research prompts, developed sub-query generation and keyword-injection logic, and tuned JSON output formatting to improve retrieval accuracy for Spydr's Deep Research AI product.
- Implemented rate limiting and token management and tested the system across 10+ domains; contributed to backend and graph-database integration using FastAPI and Neo4j to support scalable product growth, reaching 300+ users.

iVue | Atlanta, GA *May 2025 – February 2026*
Web Development Intern

Robotics and media company producing autonomous drone systems and technology content.

- Built and maintained web platforms for iVue Robotics, Media, and News, driving product visibility across 3 brand channels.
- Designed and deployed user-focused web pages supporting the launches of the Air Drone series, Operator OS, and the Autonomous Humanity podcast, improving engagement and reaching 500+ visitors.

Projects

Your Taste | Personal Project Fall 2025
Founder & Developer

AI-powered app helping users discover vegetarian- and vegan-friendly restaurants; built independently outside coursework.

- Developed personalized filters, chatbot support, and location-based recommendations to improve restaurant discovery for users.
- Scaled the platform to 50+ users and integrated AI/ML models to improve recommendation accuracy, winning an international hackathon.

Relevant Coursework

AP Computer Science A: Object-oriented programming, data structures, recursion, and algorithm design using Java

AP Physics C: Mechanics: Kinematics, Newtonian mechanics, energy, momentum, and rotational motion using calculus-based methods

AP Calculus: Differential and integral calculus, including optimization, related rates, and modeling applications

Leadership or Activities

AI Club | President / Founder *August 2024 – May 2026*

- Led club meetings and organized AI workshops and hackathons; oversaw a team of officers and all club activities.
- Partnered with 2 local startups to provide hands-on experience and hosted 6 guest speakers, broadening members' exposure to real-world AI applications.

Cyber Avengers | Officer *August 2025 – May 2026*

- Grew club membership from 30 to 50 students by leading recruitment initiatives and expanding programming.
- Led the organization of 3 cybersecurity competitions (National Cyber League, picoCTF, and CyberPatriot) for club members.
- Designed media for public exposure, including posters, flyers, and trifolds, to promote club events and workshops.

LTSF (International Nonprofit) | National Youth Leader *August 2022 – May 2026*

- Led food, blood, and health drives across 15 states, raising $80,000 and completing 4,000+ hours over 11 years.

YGT (Young Gifted Techie) | Volunteer *August 2023 – May 2026*

- Provided 200+ hours of math tutoring and job shadowed engineers at Amazon and Cox Automotive.
